

## **Dynamic Fuels Names Plant Manager**

(Gonzales, LA, August 4, 2009) Dynamic Fuels, the joint venture between Tyson and Syntroleum would like to announce that effective August 3, Don Duga will join Dynamic Fuels LLC to become the Plant Manager of the new renewable fuel commercial production facility currently under construction in Geismar, Louisiana. The Geismar plant will convert byproduct animal fat, vegetable oils and waste greases into an ultra clean diesel fuel, displacing imported oil with domestically produced resources.

Don brings more than 33 years experience in roles of increasing responsibility from Union Carbide, Rhone Poulenc, Rhodia, Nalco and Delta T Corporation. His broad experience base, including over 15 years as Plant Manager and Start Up Manager, is well suited for leading the start up and operations of this first of kind facility. Most recently, Don was a Start Up Manager/Principal Engineer responsible for successfully leading start ups of grass roots corn to ethanol plants throughout the mid west for Delta T Corporation. Previously, Don was the plant manager for Nalco's specialty chemical and water treatment plant operations in Garyville, Louisiana and prior to this was the plant manager for Rhodia Inc's sulfuric acid plant operations in Houston, Texas and Rhone Poulenc's Agricultural plant operations in Woodbine, Georgia.

Don has an excellent record for safe, environmentally responsible operations and building high performance operating teams. He earned a BS in Mechanical Engineering from Grove City College in Grove City, Pennsylvania. Don currently resides in the Gonzales area with his wife, Leisa and currently supporting Louisiana State University with two children, Jason and Lindsey.
